FYI from MGMC

By Brian Dieter, *President & CEO*

We are once again offering the Physician/Provider engagement survey this year. This is an opportunity for you to provide us with confidential feedback as to your level of engagement with the medical center.

It is no secret that 2020 was a challenging year. We found ourselves in the midst of a pandemic and the culture we have created here at Mary Greeley allowed us to quickly plan and prepare to take exceptional care of our community.

COVID-19 has forever changed us – it made us more resilient, it showed us the definition of teamwork and it afforded us the opportunity to connect with our patients as we were often times the only people they would see. We were forced to stay apart, but somehow still managed to come together to do what we do best.

We know that COVID-19 will be in the forefront of your thoughts when you take this survey, as it well should be. I strongly believe that if we hadn't already created a strong, purpose-driven culture prior to the pandemic – we would not have been able to respond the way we did to it, and I couldn't be prouder of that response.

Your feedback and input is critical to ensuring that we continue to have the culture that makes people choose us not only for their medical care, but also for the place they choose to practice medicine. Watch your email in the coming days for a link to provide your feedback.

We would not have weathered the past year as well as we have if it weren't for your dedication to the medical center and the patients we serve. Thank you for being heroes in our community and helping us live out our vision of being the best.
